

Together with the Washington State Department of Health, we have been hard at work for the past six months translating our prenatal genetic testing [educational video series into Spanish](#).

This project was so much more challenging than expected, especially given the limited Spanish language skills of our staff. We couldn't have pulled it off without the incredible expertise and support of many talented and generous people including:

- Karla Leavitt, M.D.
- Kathy Morris, MS, LGC
- Melissa Hsu, MS, LGC
- Paulina Alanis
- Mariana Brazon
- Chris Marquardt
- Valerie Krueger
- The incredible talented team at TruScribe and Edge Studio

We thank you from the bottom of our hearts! It was a pleasure to work with you all and we know these videos will be an incredible resource for women all over the world regarding prenatal genetic testing.

Sincerely,

GSF Staff
